

CHEMISTRY

# European Women in Chemistry

Edited by Jan Apotheker and Livia Simon Sarkadi

For the official book to celebrate the International Year of Chemistry, the European Association for Chemical and Molecular Sciences (EuCheMS) has chosen one of the central goals of the International Year: the contribution and role of women in chemistry. This celebration, which is the focus of European Women in Chemistry, takes us on a journey through centuries of chemical research, focusing on the lives of those amazing women from ancient times to the current day who dared to study this subject, often against advice or societal expectations.

- With a foreword by the President of the IUPAC
- Provides highly readable short stories without needing scientific in-depth knowledge and is enhanced with illustrations

These portraits emphasize the extraordinary path and personality of these fascinating women, their major contribution to chemistry, but all in the context of their time and social environment. Some of these women, like Marie Curie and Dorothy Crowfoot Hodgkin, are famous and still well-known today. Others have contributed significantly to the development of science and lived an exceptional life, but are nowadays almost forgotten. This book is a tribute to all of them and a motivation for new generations to come to tread new paths, fight for unusual ideas and control one's own destiny.

Paperback | 256 pages | 2011 | ISBN 978-3-527-32956-4 \$29.95 | £22.50 | €24.90

Quantity discount is available on request, please contact sdress@wiley.com for further details.
